

Think Ergonomics

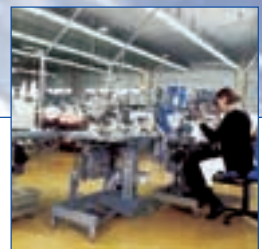

The Silent Revolution

From Stand to Key Player

Sewing operations / facility around 1930 – when ergonomics was still in its infancy.

Modern sewing operation. At the start of the new millennium, ergonomic products by KESSLER can be found all over the world.

The Basis of Our Success: Consistent Specialization

At KESSLER, we started thinking about ergonomic workplace design earlier – and more consistently – than others. With its new concepts, such as two-leg stands, pedestal designs, and height and angle adjustable work surfaces, KESSLER has led the way to the future. Every component was tested over the years and continuously and decisively improved.

Over the past five decades, a small plumbing business founded in 1897 has grown to become one of the leading manufacturers worldwide for sewing machine stands and complete workstations. KESSLER has played a lead role in the development of ergonomics – and is continuing to set trends for the future.

Superior ergonomics plus maximum durability – that's the fundamental concept behind our program and the basis for futureproof, lasting business. Values you can rely on. The family-run company of KESSLER gives you its word on that – as it has done for four generations.

Hans-Jörg Kessler. The third generation at KESSLER, and head of today's traditional company.

Siegfried Kessler (right), fourth generation at KESSLER, with John Kovacs, head of "KESSLER AMERICA".

State-of-the-art production processes ensure quality products

Ultramodern installations are a distinctive feature of production.

Perfection down to the smallest detail: robots guarantee highest precision.

Economical as well as beneficial to the environment: powder-coating installation.

KESSLER ships 80% of all orders within 48 hours.

Economical Production Based on Modularity

All our endeavors in development, engineering and production are subject to one principle: modularity. Cost-optimized series production enables us to achieve prices that are surprisingly low in comparison to the competition, even where the most complex products are involved. High-capacity production with more than 7500 square meters (approx. 68000 square feet) floor space in our factory in Nusplingen, South Germany, a perfected quality assurance system, and efficient logistics enable us to deal with the majority of our orders within 48 hours – always in typical KESSLER quality. KESSLER POLSKA, our Polish production location in Przeworno, also manufactures precisely according to German quality guidelines – and its machine park is virtually identical. Our own R&D department ensures that new ergonomic developments flow continuously into series production, and that individual requirements can be immediately translated into practicable solutions.

A total of five product families, all of modular design, enable hundreds of possible combinations, customized solutions for special task scenarios, and cost-optimized series manufacture of individual components.

New prototypes for the product series of the future.

Development and design – where new ideas are born.

Series KES-2000 – electrically height adjustable at the touch of a button. The ideal workplace for sitting or standing, it has proven its worth thousands of times over.

Series KEG – the flexible pedestal stand (height adjustable either electrically or manually).

Series KES – for heavy and dynamic sewing machines.

Series KES-2100 – extremely large height adjustment range (by hand crank).

Series KSV – the basic model, proven a hundred thousand times over.

KESSLER – Know-How for Workstations of All Kinds

Anyone who has achieved a lead position in a highly specialized market, as

KESSSLER has for sewing machine stands, is committed to look after

From the that market with as much care as possible. The specific know-

favorably-priced how can also be used for workplaces in other industries,

basic model to complex worksta- for example:

tions for every task scenario – at KESSSLER

you get a maximum of ergonomics, user comfort,

durability, flexibility and long-last-

ing quality, all at a com-

petitive price.

◆ assembly workstations,

◆ flexible sitting and standing workstations,

◆ workstations for the physically challenged and

◆ customized workstations.

Reconciling economic efficiency with humanity – that's the objective we at

KESSSLER have set ourselves. Workstations for sitting and standing, which

conform to our product philosophy make working easier, increase work sat-

isfaction, preserve working energy and consequently have a beneficial effect

on the products produced.

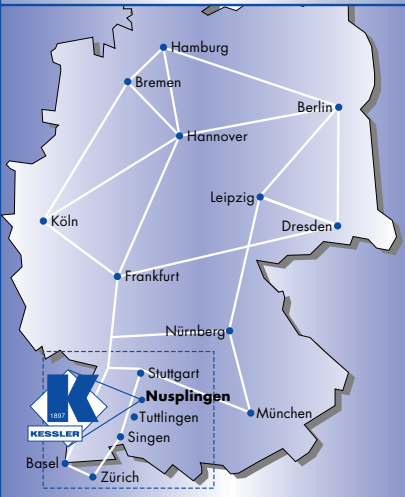

Example: worktable with recessed work surface 1.5 m (59 in.) and energy strip.

Example: worktable with standard work surface 1.5 m (59 in.) and energy strip.

KESSLER – pioneer and market leader worldwide for stands used in the sewing industry, and manufacturer of workstations that are ergonomically exemplary – from the favorably-priced basic model all the way to high-tech solutions.

Naturally we're present in the entire global market. Our own distribution and production activities in our key markets create marked customer proximity.

With "KESSLER AMERICA" and "KESSLER POLSKA", our customers

in the US and Eastern Europe

have access to partners who are fully conversant with the specific conditions of their markets.
